For the att of Rob Anderson

9th November 2016

Dear Rob,

I should like to thank you for your recent work in making recommendation for the reduction of storage/files in our offices. We have been looking at ways to secure increased space in our offices and the shredding and archiving of data made good sense to all here

We were very pleased to see the files shipped to Sydney Road and arrive back on a very simple CD formatted disc – excellent work and something I have been talking about to other contacts over the last few weeks. I am sure there were many issues that emerged along the way but as everything happened seamlessly I cannot even comment on anything

The work and attention to detail was very good and I was kept up to speed at all times. I was very happy with the end result and the process.

Thank you again and I will obviously continue to introduce you to both business and personal contacts I have

Kind regards

Malcolm Topping
Director
